Jeg har opnået en fin code coverage. Jeg tror de eneste ting jeg mangler at teste er constructorerne, siden den viser disse fejl:

```
*/  
public class Reibursment {  
    public static int getReimbursement(boolean deductible, String visitType){  
        //set return value til 0 by default  
        int percentageReimbursed = 0;
```

og

```
public class Calendar {  
  
    public static int getNumDaysInMonth(int month, int year) throws Exception{
```

det er de eneste røde linjer der er.
